1 Introduction

For this assignment, I watched the following videos:

2 RDFa elements

The page listing the offered gifts was enhanced by the addition of RDFa elements embedded in the listings. After generating the static HTML code, it was tested on RDFa Play shown in Figure 1.

3 JSON-LD elements

To implement JSON-LD format on the webpage, additional script tag was injected into the HTML code. The script contains the graph defined in JSON format. The test results are shown in Figure 2.
